

Church Planting Culture Committee Report October 9, 2018

The committee met on 9/18/18.

Howard gave an update from the Elder's discussion of possibly allowing for a non-traditional church option in our plans. Since the Elder discussion needed to be stopped before all questions and perspectives could be shared, the committee decided to send a follow-up email to the Elders outlining one of many scenarios for operating a church which could meet in homes. The committee provided input for Howard to use in the email sent to the Elders on 9/21/18. Hopefully in our 10/9/18 meeting we will have time to continue answering questions and receiving input on this topic.

Howard shared the Elder's request that the committee develop a church planting pastor's job description. Howard has collected samples from some of our existing pastors and from EFCA West for guidance.

The committee reviewed the Madera Church Status Report. There was no change from last month.

The committee updated the specific prayer list for the Madera church plant and then took it to the Lord.

In His Service,

Howard.
